SB 1383 KEY IMPLEMENTATION DATES

California Senate Bill 1383

Property Waste Management Program

- Tools - receptacles, signage, correct waste bags for compost, recycle, and trash.
Training materials.
- Departmental WM Champions – One or two Managers from each department to ensure tools are in place and up to date. Provide positive encouragement .
Monitor their areas for proper sorting.
- Education & Training - Videos and slide shows to be presented at new hire orientations and periodically at Manager and departmental meetings as a refresh and update.
- Monitoring - Regular checks of main waste and individual disposal areas to ensure recycle, trash and compostable are being properly sorted, and that contamination of recycle and compostables is not occurring. Report noncompliance to Department Champions. Record information from refuse company invoice to track progress. Here at Cavallo Point the job of monitoring is handled by the Grounds and Maintenance Department managers.

INTRODUCTION TO THE INDUSTRY

Each year, the amount of waste sent to landfill increases.

In the 60's, the average person produced **2.28 pounds** of waste per day.

Since the 60's, the amount of waste each person produces has almost doubled to **4.40 pounds** per day.

75% of the waste we generate is recyclable, but only **34% is recycled.**

GREENHOUSE GAS EFFECT

CO₂

CH₄

LANDFILL SITE

y eso hace que se descompone de tal manera que genere mucho metano.
